

# Certified Passivhaus Consultant & Designer Course

**November 3<sup>rd</sup> to 6<sup>th</sup> and 17<sup>th</sup> to 20<sup>th</sup>**  
**Certification Exam Friday December 4<sup>th</sup>**

This eight day classroom training is aimed at ALL Building Professionals: Architects and Mechanical, Civil, Structural and Electrical Engineers, Contractors and Builders. A combination of lectures by leading Passivhaus experts, group design and calculation exercises, workshops, and exchange with experienced contractors.

Passivhaus buildings are extremely resilient, provide superior air quality, a high level of thermal comfort and extremely low energy demand. All building types can be designed and built to the Passivhaus standard: Mutli-family, offices, school, retail, municipal buildings.

**Burlington Electric is offering a reduced course fee of \$650 for all attendees whose businesses reside in Chittenden County.**

## **Course Accreditation:**

On successfully passing the exam, Participants will receive the internationally recognized accreditation as Certified Passive House Consultant / Designer, joining a rapidly expanding global community.

## **This program has been accredited by:**

- American Institute of Architects (AIA) and is worth 45 Learning Units
- Building Performance Institute (BPI) and is worth 28 CEUs
- UVM course credits are available for this training. For more information please contact Michael Doordan at [michaeld@better-bee.com](mailto:michaeld@better-bee.com).
